Interference Information

If these measures do not eliminate the interference, please consult your dealer or an authorized service provider for assistance.

If you have any questions or need assistance, please contact your carrier or service provider.

Hearing Aid Compatibility (HAC)

This device complies with the hearing aid compatibility (HAC) standard set by the Federal Communications Commission (FCC) for use with hearing aids. This phone has been certified by the manufacturer as having adequate performance for use with hearing aids. If you have questions about compatibility with your hearing aid, please contact your service provider.

CID Error Codes

1. Deleting All CID Records

2. Reviewing Records Stored in Memory

3. Receiving an Intercom Call

4. Programming the Handset

Installing the Phone

1. If using a phone line, plug the phone line cord into the jack labeled PHONE LINE on the base.

2. If using a cordless phone line, plug the phone line cord into the jack labeled CORDLESS PHONE on the base.

3. Place the base on a flat surface and ensure the antenna is not obstructed.

4. Connect the power adapter to the base and plug it into an electrical outlet.

5. Press the reset button located on the back of the base to initialize the phone.

Installing the Handset Battery

1. Slide the battery door open and insert the battery with the plus (+) and minus (-) terminals facing the correct direction.

2. Close the battery door and ensure it clicks into place.

3. Charge the battery by connecting the power adapter to the handset and placing it on the base.

Equipment Approval Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and

2. This device must accept any interference received, including interference that may cause undesired operation.

WARNING:

Do not attempt to disassemble, repair, or modify this equipment. This may result in damage to the equipment and void the warranty.

Coverings or tags containing FCC identification numbers must not be removed.

Labeling:

FCC NO: 15A4006/6430

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and

2. This device must accept any interference received, including interference that may cause undesired operation.

This device complies with the Hearing Aid Compatibility (HAC) standard set by the Federal Communications Commission (FCC) for use with hearing aids. This phone has been certified by the manufacturer as having adequate performance for use with hearing aids. If you have questions about compatibility with your hearing aid, please contact your service provider.
If you get a busy signal and want to keep dialing the number, press the redial button until all of the digits are erased.

Remember to save extension numbers in a location that can be easily reviewed but were received from the same number more than once show as EXTENSION?

Paging All Handsets from a Handset

1. Make sure the phone is OFF (not in talk mode).

2. Press the page button on the base. All handsets beep for two minutes, and the page feature helps you locate a misplaced handset. To send and receive another handset and have an off line, private (two-way) intercom conversation, use the MUTE feature. The赶来handset displays PAGING FROM... and helps you set up and use your phone.

3. Use the touch-tone pad to enter the memory location number.

4. Press the #PAUSE button on the handset to display 1HI 2LOW 3OFF.

5. Use the touch-tone pad to enter a name (up to 15 characters). More than four characters display as ***.

6. Press the MEM button.

If you are using the handset and want to switch to the speakerphone, press the SPK button. If you are not at home or cannot answer, your telephone answers the call for you. When you hear the call waiting beep in the handset receiver, press the SPEAK button to switch to the speakerphone and have a conversation with the waiting party. When you’re done, press the TALK button to return to the handset.

NOTE: To cancel page, press the PAGE/INT button again or the *exit button on the 发送 handset.

Inserting a Pause in the Dialing Sequence (of a Stored Number)

1. Make sure the phone is OFF (not in talk mode).

2. Press the page button on the base. All handsets beep for two minutes, and the page feature helps you locate a misplaced handset. To send and receive another handset and have an off line, private (two-way) intercom conversation, use the MUTE feature. The赶来handset displays PAGING FROM... and helps you set up and use your phone.

3. Use the touch-tone pad to enter the memory location number.

4. Press the #PAUSE button on the handset to display 1HI 2LOW 3OFF.

5. Use the touch-tone pad to enter a name (up to 15 characters). More than four characters display as ***.

6. Press the MEM button.

When you receive a call, the Caller ID information is transmitted between the telephone and the answering machine. The display shows the time as well as the number and the name. Some calls, however, are not ID’d, so you might hear a busy signal when the call is actually incoming. When you hear a busy signal, press the redial button twice and then hang up. When the waiting call shows on the display, press the redial button to cancel the busy signal and return to the waiting call.

Using the CID Display
